INTRODUCING THE NEW FEEL OF ADVANCED ALLERGY PROTECTION

FEATURING SENSOPRENE® FORMULATION

GAMMEX® NON-LATEX SENSITIVE, A GROUNDBREAKING SURGICAL GLOVE

A complete surgical glove solution

Ansell, the global leader in hand protection, is proud to introduce the **GAMMEX® Non-Latex Sensitive** surgical glove. The new **SENSOPRENE®** non-latex, chemical accelerator-free formulation delivers a unique surgical glove, offering unprecedented comfort and sensitivity with advanced allergy protection (against both latex and chemical allergies) for healthcare workers and patients.

Ansell's uncompromising commitment to product innovation

Ansell continuously strives to provide the highest levels of allergy protection for healthcare workers and patients. Our relentless pursuit of innovation is the driving force behind the GAMMEX® Non-Latex product line. This line features a wide range of customized options that incorporate new non-latex materials and technologies to help reduce the risk of latex allergies as well as the first chemical accelerator-free surgical glove to minimize chemical allergic reactions.

Now, Ansell extends the GAMMEX® product range with another non-latex glove innovation—the **GAMMEX® Non-Latex Sensitive** surgical glove.

The need to go beyond non-latex

While many hospitals worldwide have switched to non-latex gloves to reduce the incidence of latex allergic reactions among healthcare workers and patients, chemical allergies, also called type IV allergies, have increased steadily.¹ In fact, clinical evidence shows that 33% of glove-related reactions are chemical allergies, while 17% are latex allergies.^{2,3}

INTRODUCING THE NEW FEEL OF ADVANCED ALLERGY PROTECTION

FEATURING SENSOPRENE® FORMULATION

GAMMEX® Non-Latex Sensitive surgical gloves ONE GLOVE FOR MULTIPLE NEEDS

By offering all the benefits of a best-in-class surgical glove with advanced allergy protection, the **GAMMEX® Non-Latex Sensitive** surgical glove simplifies your glove-stocking decision. Now you can choose one glove with comfort and sensitivity to satisfy healthcare workers both with and without latex and chemical allergies.
