

Xcel MicroFiber™

Xcel MicroFiber™, Powered By Our Patent-Backed Xcel Microfilaments™, Is The Newest, Most Innovative & Most Dynamic Microfiber Available To The Market Today. And It's Delivered In A Dry, Disposable Task Wipe That's Absolutely 100% True Microfiber With Every Pull. Go XCEL™

Xcel MicroFiber Powered by Xcel Microfilaments Properties & Specifications:

- + Clean Manufacturing
- + Safe Components (PVC-free)
- + Minimum Resources
- + Harmless Waste

Xcel MicroFiber + Clean Manufacturing

ISO 14001 certification.

Manufactured in a continuous process from the raw materials to the fabric.

Production process of Xcel MicroFiber is binder and solvent free.

Nonwoven; consists of only polyester, polyamide and water (hydroentangled).

Manufactured in Europe, complying with European chemical regulations, converted and packaged in the United States.

Xcel MicroFiber + Safe Components

PVC-free.

Xcel MicroFiber is made of polyester, polyamide and water.

Our fundamental components are safe and stable for the humane health and the environment, in normal conditions of use. *

Two-to-Thirty times lighter than traditional materials, Xcel MicroFiber dramatically minimizing the use of raw materials.

More eco-friendly byproduct when converting.

Xcel MicroFiber + Minimum Resources

Because of our manufacturing process, Xcel MicroFiber edges are non-fraying; converting is simplified, requiring fewer materials.

Our process also uses fewer operations than traditional fabric production, saving energy during its manufacturing life.

Water used during manufacturing is recycled, and then re-used in a protected and closed cycle.

Xcel MicroFiber + Harmless Waste

We encourage recycling as the best way of managing Xcel MicroFiber waste. *

It is also important to note that Xcel MicroFiber can be incinerated or landfilled without any risk of emissions of halogeneous substances. *

As Xcel MicroFiber is majority-polyester and nonwoven, it can be recycled with no complex process. *

* XCELCO, Inc. / Xcel MicroFiber makes no statement and no guarantee of chemicals, additives &/or agents added to the material by independent third-parties.
