

BASX™ BLADELESS TROCAR

Striking an affordable balance between clinical requirements and economic demands, BASX™ trocars offer only the essential features needed for general procedures and a limited number of product codes for efficient inventory management.

Durable Universal Seal

- No reducer caps needed
- Accommodates a wide range of instrument sizes (4.7mm–12.9mm)

Integrated Stability Thread Design

Recessed Stopcock Valve

- Mitigates inadvertent opening/closing of valve during surgery

Low Profile Housing
