

# Tubigrip™ Arthro-pad

## FOAM PADDED TUBULAR ELASTICATED SUPPORT BANDAGE

- Tubigrip Arthro-pad provides non-invasive mechanical support for the elbow or knee after injury or surgery

- Washable and reusable

- Easy to apply and remove

- Provides firm, comfortable support for the affected joint

- Retains body heat

## HOW TUBIGRIP ARTHRO-PAD WORKS

Tubigrip Arthro-pads are constructed from polyurethane foam enclosed in a double layer of Tubigrip tubular bandage.

This double layer of Tubigrip provides firm support, encouraging use of the affected joint. In addition, the combination of Tubigrip and polyurethane foam retains body heat.

Arthro-pads are quick and easy to apply, making them suitable for outpatient and community use.

They are also washable, for repeated use. The neutral colour of Tubigrip Arthro-pad is cosmetically acceptable to most patients.

## BENEFITS OF TUBIGRIP ARTHRO-PAD

- Provides firm, comfortable support for the affected joint
- Retains body heat
- Easily applied and removed
- Washable, for repeated use

## MATERIAL PROPERTIES

- Polyurethane foam
- Elasticated support bandage consisting of:
  - Cotton
  - Elastodiene (contains natural rubber latex)
  - Polyamide

### Washing instructions

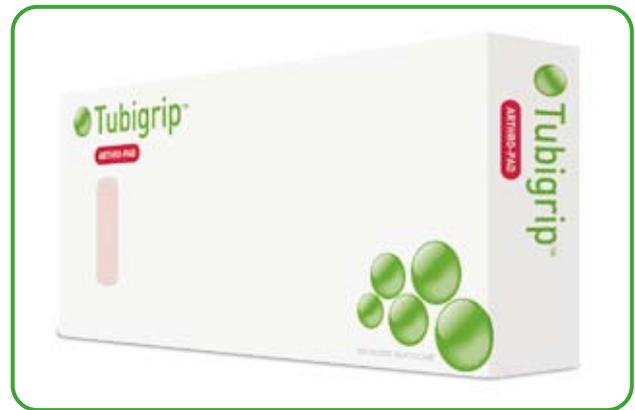

## AREAS OF USE

Tubigrip Arthro-pads are used to provide support for the elbow or knee after injury or surgery. They may also be of value to patients with arthritis of these joints.
